

Civil Engineer

Title: Civil Engineer

Location: Sheridan, Wyoming

Job Description: FDL Consulting, LLC has an immediate opening for a civil engineer with a BS or MS in Civil Engineering. This challenging position will have a focus in the oil & gas industry. You will work along with our engineering team in preparing plans and technical specifications, surveying, construction engineering, geometric design, hydraulic and hydrologic design. Along with, water resources, reservoir design and permitting, quantity schedules and bid packages. The successful candidate will be a progressive, self-starting individual and will be given special consideration for knowledge of and experience with AutoCAD Civil3D. Previous experience in the engineering field is an added plus. Some travel is required and you must have a valid driver's license.

Requirements: Bachelor or Masters of Science Degree in Civil Engineering; valid driver's license and insurable under FDL's vehicle insurance; strong background in computer applications; working knowledge of AutoCAD; progressive, self-starting individual with good communication skills.

Personal Qualities:

- Self-starter, driven, motivated with a positive attitude
- Flexible and available to respond to changing client schedules
- Results oriented with attention and detail
- Able to communicate effectively; verbal and written communication
- Ability to function both independently and as a part of a team

Compensation: Competitive salary and benefits negotiable based on experience. Benefit package includes generous holiday and personal time off; health insurance; a 401K; and bonus potential.
